NOTE

THIS edition of the Adjustable Classification has been slightly revised and interleaved for the special use of librarians and readers in libraries where it has been adopted. In this form it can be used as a guide to the classification of the library by both the staff and the borrowers.

ADJUSTABLE CLASSIFICATION FOR LIBRARIES

THIS method of classification has been compiled largely in response to a demand for an English scheme with a notation enabling continual intercalation of divisions and single topics or books to be carried on. The Quinn-Brown method has been used as a basis, but suggestions have been freely adopted from every important classification described in my "Manual of Classification."

The name "Adjustable" has been taken to distinguish the system from all others and to describe its principal feature.

The **main classes** are distinguished by the first eleven letters of the alphabet, excluding I, and are arranged thus :

- A. Sciences
- B. Useful Arts
- C. Fine and Recreative Arts
- D. Social and Political Science
- E. Philosophy and Religion
- F. History and Geography
- G. Biography and Correspondence
- H. Language and Literature
- J. Poetry and Drama
- K. Prose Fiction
- L. Miscellaneous

Should it be thought desirable to have more main classes, or to divide any of those already fixed, double letters can be used for the purpose, as shown below :

- | | |
|---------------------------|-----------------------|
| A. Natural Sciences | D. Social Science |
| AA. Mathematical Sciences | DD. Political Science |
| B. Useful Arts | E. Philosophy |
| C. Fine Arts | EE. Religion |
| CC. Recreative Arts | And so on |

When this is done, it will be necessary, or at least desirable, to renumber the divisions under each main class, and change the reference numbers in the index.

In each main class the class letter alone is given to general works covering the whole or a considerable portion of the subject matter of the class at large. Thus B would mark all the general treatises or dictionaries on the Useful Arts; G general collections of Biography. The letters from M to Z can be reserved for special or local collections which are kept separate. It has not been thought advisable to provide for an elaborate system of sub-classes, divisions, and subdivisions, but simply to number in one sequence of even numbers each sub-class or division in its order. This enables the class of most books to be easily expressed by the plain notation of a letter and a figure or two—G 2, B 30, F 196, etc. The odd numbers are reserved for fresh divisions of the main classes, and it is thought this feature will be found useful in most libraries where new subjects are continually cropping up.

If it is absolutely necessary to use more divisions than the scheme provides, even when the odd numbers are all appropriated, this can be done by adding letters thus :

F 641	F 642 ^b
F 641 ^a	F 642 ^c
F 641 ^b	F 643
F 642	F 644
F 642 ^a	

Minute **sub-division** to any extent may be carried out by simply adding to the divisional numbers, after a hyphen, a fresh series of odd numbers from 1 onwards in each case. Thus one might get this progression :

G 12.	Scottish General Biography	G 12-5.	Scottish Covenanters
G 12-1.	„ Artists	G 12-7.	„ Monarchs, etc.
G 12-3.	„ Authors		

which seems minute enough and clear enough for all ordinary purposes. Further sub-division is quite unnecessary in most public libraries; but should it be deemed absolutely indis-

pensible, it can be carried out with a little extra complication and trouble by starting another series of odd numbers after a colon, so :

G 12-3.	Scottish Authors,	G 12-3:3.	Scottish Novelists
	General	G 12-3:5.	„ Poets
G 12-3:1.	„ Historians		

But the plan of wide sequential numbering adopted in each class should render the use of wearisome sub-division almost needless in the majority of cases. As in the case of divisions, alternate numbers only need be used, the even series being available for additional sub-divisions.

In **applying the system** it is recommended that the class letter and number be used for shelving and cataloguing only, and that charging or other necessary registration be done by means of the accession numbers. Each book as received should get the usual progressive accession number, and in addition the class letter and number showing where it is to be located. For this system it is not necessary to number alcoves, presses, or shelves, as the books will stand in the order of the classification herein tabulated. Additions can be made at any time and at any point, and each book takes its place, if correctly marked, among all the other books on the same subject.

In the catalogue it will be advisable to print both accession and class numbers, one series on each margin, so that the system can be applied to libraries using indicators, cards, ledgers, or open access. Where an indicator is used the accession numbers must be kept in one sequence, and in the case of Cotgreave's variety the class letters and numbers must be written into the indicator books, while in the case of Chivers' variety the same must be done on the recording tabs, as a direction to the assistant. Or a brief application form may be used, giving both class and book numbers, as will be necessary in the case of the Elliot or any other indicator having numbered pigeon-holes.

The **arrangement of divisions** on the shelves will be by authors alphabetically. There is no absolute need to mark.

individual books further if this is done properly. The accession number being used for charging, renders any system of author marks unnecessary. In open access libraries the shelves should be plainly marked with labels specifying their contents. Presses should also be marked with the names of the main classes shelved. It is further recommended that in such libraries the books on all shelves be differentiated by means of coloured labels, such as are generally used in British open access libraries, in order to aid the eye in detecting misplacements. The presence of a mere class or notation mark on the back of a book is not sufficient in itself to prevent misplacement, owing to the uniformity of the general appearance. It should be possible to detect instantly such a transposition as G 10 for C 10, without scanning each shelf carefully and separately.

Composite Books. When a book treats of two or three different classes, in whole or part, it is not to be put in Class L or L 34, but with the books in the class most fully covered by the preponderating subject. The author's description on the title-page is to be accepted as the authority for the relative importance of classes, the first subject word being always taken; but where this is vague, bulk must be taken to represent values. Thus a book entitled *Hints on Chemistry, Engraving, and Building Construction*, if put with Class L or L 34, is completely separated from all related subjects; but if marked A 250 \times C 104 \times B 60, and placed after A 250, its composite character is at once indicated, and the book shelved with the class of which its most important section treats. Luckily main classes are very seldom mixed like our example, unless in encyclopædic works, and it will not often be necessary to insert composite works like the one mentioned. The main value of this composite marking will be found in single main classes, in which examples frequently occur of books treating of two or three distinct divisions. Fortune's *Journey to the Capitals of Japan and China* (1863), if put in F 454, "Asia, General," is widely separated from all the other literature of both China and Japan; and though the catalogue would no doubt bring such scattered articles together,

it is just as desirable that the shelves should give the same information as far as physically possible. If, therefore, Fortune's book is marked F 508 × 470, the local section will be strengthened, and the general section, always a dumping ground for the vague or the complex, will be made less unwieldy and overcrowded. One of the best descriptions of the arid plains of Queensland will be found in Boothby's *On the Wallaby*, which contains a preliminary tour through Ceylon, the Malay Peninsula, Java, and New Guinea. The title gives some idea of this; but a very brief examination of the book will show the exact ground covered, and also bring out the fact that Queensland is the preponderating subject. If marked F 86, a valuable contribution to the descriptive topography of Queensland is separated from all other books on that topic; but if marked F 1290 × 86, it at once takes its place with the geographical division of which it principally treats, while at the same time it is qualified in such a manner as to indicate that it deals with other areas.

Three separate topics in one composite book seems a fair limit for the "General," which is not general enough to be separated from some allied class or division. When more than three independent classes are included in one book, it is best that it should be treated as an encyclopædic composite, and put in Class L 34. In the case of works treating of more than three independent divisions of a main class, the same rule is to be observed, the "General" number in each case being the receptacle.

As indicated above, **special collections** of all kinds can be marked by the unused class letters M to Z. It is generally best not to incorporate such collections in the ordinary classification, but to shelve them apart. The books in a special collection, of whatever nature, are to be classified the same as other books; but a qualifying letter can be used to distinguish them. A collection of books on the county of Northampton could be indicated by the additional class letter N put before the ordinary class letter and number. For example:

NA 8.	Scientific Societies, Journals, Reports, etc.	NG 8.	Local Biography, General
NA 62.	Local Fauna	NH 158.	Glossaries
NA 106.	Ornithology	NH 384.	Libraries
ND 434.	Schools—Histories and Reports, etc.	NJ 14.	Poetry
			And so on

In ordinary libraries the sub-division of countries can be carried out by adding sub-divisional numbers to express the classification thus :

F 750.	Northamptonshire, Generally
750-1.	Scientific Societies, Journals
750-3.	Fauna and Flora
750-5.	Geology
	Etc.

Special collections of a certain author's works can also receive an independent letter ; but in this case the following arrangement is recommended. In a collection relating to Shakespeare, Scott, Burns, or other great author, proceed thus :

S 1.	Collected Editions in Chronological Order. Author's	S 7.	Musical Settings of Works
S 2.	Collected Editions in Chronological Order. Editors'	S 8.	Dramatic Versions of Works
S 3.	Selections	S 9.	Pictures suggested by Works
S 4.	Single Works in Chronological Order of Publication, Originals and Reprints together, and Parodies	S 10.	Biographies
S 5.	Translations of Collected Works	S 11.	Correspondence, including Autographs
S 6.	Translations of Single Works	S 12.	Portraits
		S 13.	Criticism, History, and Aids to Study of Works
		S 14.	Periodicals and Societies
		S 15.	Ana, Scraps, etc.
		S 16.	Bibliography

Other varieties of special collections can be arranged in any order to suit local conditions ; but as we have said before, it is best to keep such collections separate, as there will always be a tendency to distort classes or divisions by including specially fostered subjects.

In all schemes of classification the question of the **sizes of books** crops up as a disturbing or qualifying factor.

It would be an extravagant waste of space to shelve Owen Jones's *Grammar of Ornament* alongside Lewis Day's little books on the same subject, or to place the huge atlases of Johnston and Stanford cheek-by-jowl with pocket varieties. Convenience, considerations of appearance, and even tradition, all point to the separation of the great from the small as inevitable. New libraries should therefore provide adequate storage room for quarto and folio books in addition to ordinary octavos, and this is best done by erecting special cases with space for folios below and quartos above a projecting ledge about three feet from the floor. The classes will run in three separate sequences—one for demy 8os and under, one for royal 4tos and under, and another for folios larger than the largest 4to and above that size. In the catalogue these can be indicated thus :

Octavos, etc.	No mark other than the class letter and number
Quartos	By an asterisk <i>before</i> the class letter, *F 90
Folios	By a small cipher <i>before</i> the class letter, °F 90

Experience proves that qualifying letters or signs put *after* numbers are generally overlooked. For staff purposes it is not needful to put guides, dummies, or directs on the shelves where folios and quartos ought to be. For the public, if open access is allowed, a general statement explanatory of the triple arrangement posted liberally about will be found ample; or class location books can be used. In Lending Libraries it will seldom be necessary, unless as regards Music, to provide much folio or quarto space. There are several good varieties of adjustable shelving now to be had, which greatly diminish the difficulties connected with size classification.

It only remains to state, as regards the classification itself, that the divisions "General" and "Special" provided all through the tables are intended to render sub-division easy when the library has attained very large dimensions. B 90 will probably contain every variety of *complete* general work on Civil Engineering; while for years to come the division B 92 will serve to mark works on single parts of the main topic, as

Bridges, Canals, Docks, Harbours, Roads, etc. When the time arrives, the only fresh mark necessary will be a simple figure added to the existing divisional number :

B 92-1. Bridges

B 92-3. Canals

B 92-5. Docks

B 92-7. Harbours

B 92-9. Roads

or whatever the subjects may be. There is no complication about this, and the sub-divisional numbers may be kept from the very first if thought necessary. The "Adjustable Classification" is not put forth as either perfect or complete, nor is the index more than a fair selection of likely subject words. Suggestions for improvement and notifications of errors or omissions will gladly be received by the author.
